Water Treatment for Hemodialysis* ITEM # NT-P102

Designed to help dialysis personnel with changes in their incoming water supply or treatment system that could have serious consequences for their patients, and UPDATED WITH ANSI/AAMI RD62:2001 STANDARDS. It discusses each of the water treatment system components, the contaminant that each component removes, and monitoring parameters. This manual can also be used as a basic guide for designing a new water treatments system.

Members: \$35.00 Non-members: \$45.00

Dialysis Technician Training CD* Item # NT-C-100

Ready-to-use teaching materials for patient care technician training. On one CD-ROM you get PowerPoint® presentations for 8 teaching sessions including speaker notes to accompany all 8 presentations, post-tests and answer keys. These training materials will help you save time and money on curriculum development; train new employees; review key points with practicing technicians; and help dialysis technicians prepare for certification exams. Invaluable to technician training programs and dialysis clinics for in-service training.

- **Unit 1:** Overview of Dialysis
- **Unit 2:** Understanding the Person with Kidney Failure
- **Unit 3:** Principles of Dialysis
- **Unit 4:** Hemodialysis Devices
- **Unit 5:** Vascular Access
- **Unit 6:** Hemodialysis Procedures and Complications
- **Unit 7:** Dialyzer Reprocessing
- **Unit 8:** Water Treatment

Colorful illustrations and charts. Easy to understand language. Well-organized content.
